# GIS in Government Innovation

- ❑ Kent County's GIS team created an ArcServer web application for the Department of Aeronautics.
- ❑ The GIS team worked with the Dept. of Aeronautics at the Gerald R. Ford Intl Airport to vastly improve workflow processes, accuracy, and reporting ability.
- ❑ Went from a "Post-It on a paper map" process, to using the latest GIS technology to track Part 77 sites.
- ❑ Office staff can now access this data from their homes or office, 24hrs a day, and feel confident they are looking at the most correct and updated data to make decisions.
